

## Fort DuPont Activity Center

*September-October 2015*

Please join us at Fort DuPont Activity Center for our environmental education programs intended for individuals of all ages on every Saturday of September and the first Saturday of October!

**All Programs are free lasting from 11am-1pm and limited to 20 individuals.**

**Call (202) 426-7723 to RSVP by the Thursday before the event.**

### Build a Terrarium September 12<sup>th</sup>

Love gardening but don't have a spot for a garden in your backyard? All you need is a sunny window in your house to locate a plant. This particular program will allow individuals to learn about indoor gardening while creating their own windowsill planter from provided recycled items.

*For the terrarium program: **Please bring your own CLEAN two liter bottle if possible.***

### Beneficial Insects September 19<sup>th</sup>

Like ladybugs? Learn about the bugs that have your back in this educational program. After learning about these friendly critters individuals can head outside to catch and identify a new pal. Interested individuals will receive a bug house to take home.

### Composting Basics September 26<sup>th</sup>

Composting is a natural form of recycling. Compost can be affected by many different environmental factors. Learn about the basics of outdoor composting in this informational session. Since worms play an important role in this process, participants get to make a felt worm craft!

### All about Trees October 3<sup>rd</sup>

Trees are everywhere. They provide us with essential oxygen and reduce carbon dioxide in the atmosphere. In this program, participants will actively identify trees in an outside setting and create a craft with items they gather from tree materials.
